

Tariq Ahmed

Full Stack Web Developer

tariq858555@gmail.com | linkedin.com/in/tariq-jamil-khan | github.com/tariq9012

PROFILE

Full Stack Web Developer building the connective tissue between a good idea and a useful product. Comfortable across the stack — from role-based frontends to the APIs, databases, and auth that support them. Recent work spans marketplace, booking, and operations platforms built on React/Next.js with PostgreSQL and Supabase. Looking to contribute to teams and client work where craft, curiosity, and a bias toward useful outcomes are valued.

SKILLS

Frontend	HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, TanStack Start, Python, Django
Data & Auth	PostgreSQL, MySQL, MongoDB, Drizzle ORM, Supabase, JWT, Schema Design
Workflow	Git, GitHub, Vercel, REST APIs, VS Code

PROJECTS

Medix

Healthcare / Full Stack — React, TanStack Start, Drizzle ORM, PostgreSQL, Tailwind CSS — github.com/tariq9012/Medix-Hospitals-Website — medix-hospitals-website.vercel.app

- Built a public doctor/hospital directory, appointment booking, and medical-record management with realtime messaging over SSE.
- Shipped separate patient, doctor, hospital-admin, and platform-admin portals with role-based access control throughout.

Learnora

Education / LMS — React, Prisma, PostgreSQL, Tailwind CSS — github.com/tariq9012/LEARNORA-Website — learnora-website.vercel.app

- Built a learning-management platform with Student, Instructor, and Admin roles on a Prisma/PostgreSQL backend.
- Delivered course and lesson management with media storage and a premium, original design system.

Shop Manager

Retail / POS System — HTML, CSS, JavaScript, Node.js / Express, PostgreSQL — github.com/tariq9012/Shop-Management-System — shop-management-system-frontend.vercel.app

- Built a barcode-ready point of sale, inventory, supplier, and customer-CRM system with role-based access.
- Implemented purchase orders, returns/refunds, and a full stock audit trail as atomic database transactions.

BizLinko

Job Marketplace / Full Stack — TanStack Start (React), Supabase (Postgres, Auth, RLS), Tailwind CSS — github.com/tariq9012/BizLinko-Website — biz-linko-website.vercel.app

- Built job seeker and employer dashboards with authenticated, role-based access and an admin area.
- Implemented job search, listings, company profiles, and application management on Supabase Postgres with Row Level Security.

EstateHub

Real Estate Marketplace / Full Stack — React, Express, PostgreSQL (Neon), JWT — github.com/tariq9012/EstateHub-Website — estatehub-website-five.vercel.app

- Built a three-role platform (Buyer, Agent, Admin) with JWT auth enforced server-side on every protected route.
- Implemented listings, favorites, inquiries, appointments, and agent license verification on a 29-table PostgreSQL schema.

IronPulse Gym

Gym Management Platform / Full Stack — Next.js, PostgreSQL, Drizzle ORM, better-auth — github.com/tariq9012/ironpulse-gym — ironpulse-gym-pi.vercel.app

- Built member, trainer, and admin portals with role-based authentication and a real-time admin control center.
- Delivered member-facing workout, nutrition, booking, payment, and progress tracking features.

Luma Restaurant

Restaurant Platform / Full Stack — React, Express, PostgreSQL, Drizzle ORM — github.com/tariq9012/Restaurant-website — restaurant-website-luma-restaurant.vercel.app

- Built menu browsing, reservations, and online ordering on a typed Express API with JWT auth.
- Generated the frontend API client and validation schemas directly from an OpenAPI spec.

Shopinza

Commerce / Full Stack — HTML, CSS, JavaScript, Node.js / Express, MongoDB — github.com/tariq9012/shopinza-e-commerce-website — shopinza-e-commerce-website.vercel.app

- Built product discovery, cart, and checkout foundations on a MongoDB-backed, backend-ready data model.
- Designed responsive product detail views with a calm, purposeful content hierarchy.

Zovari

Community / Full Stack — HTML, CSS, JavaScript, Node.js / Express, MySQL — github.com/tariq9012

- Built a modular, structured feed with post composition and conversation-first interaction patterns.
- Developed profile and social-graph foundations on a MySQL-backed content model.

Cleaning Website

Business / Frontend — HTML, CSS — github.com/tariq9012/Cleaning-Website

- Built service showcase, team/expert profile, and customer feedback sections from hand-written HTML and CSS.
- Delivered a fully responsive layout with no framework overhead, keeping the site fast and simple to host.

EDUCATION

BS (Computer Science) — Iqra University, Islamabad Campus — Expected 2028	3.0 GPA
ICS — Punjab Group of Colleges — FBISE — 2023	764 / 1100
Matric — IMSB I-14/3 — FBISE — 2021	916 / 1100
